### SUMMARY

I'm an experienced JavaScript developer with over 8 years of expertise in web development. I specialize in JavaScript programming, with proficiency in frameworks such as React.js and Node.js. I'm skilled in PHP and WordPress development, particularly in creating custom themes and handling API integrations.

My goal is to deliver innovative solutions that exceed clients' expectations and meet their requirements.

---

### WORK EXPERIENCE

#### Freelancer

Oct 2023 - Present

- Developed custom WordPress themes and plugins for a diverse range of clients, ensuring seamless integration with their branding and requirements;
- Implemented responsive design principles to ensure optimal user experience across desktop and mobile devices;
- Optimized website performance and conducted SEO audits to enhance search engine visibility and user engagement;
- Provided ongoing maintenance and support services, including troubleshooting, updates, and security enhancements;
- Managed project timelines and deliverables to meet client expectations and ensure timely completion of projects.

#### Computools, Full-Stack Developer

Jun 2017 - Oct 2023

- Contributed to the development of a project dedicated to evaluating the quality of 3D models, utilizing technologies such as React.js, Node.js, TypeScript, and MySQL;
- Collaborated on the creation of various digital solutions, including marketplaces, websites for the elderly, and corporate platforms. Worked with e2e and unit tests. Applied React.js, TypeScript, Hasura, WebFlow, GraphQL, Next.js, and React Admin;
- Participated in the development of marketplaces, corporate websites, and an interactive educational platform for students, using technologies like React.js, WordPress, Sass, and XDesign;
- Designed and implemented custom WordPress themes and plugins.
- Integrated third-party APIs and services to enhance website functionality and streamline business processes;
- Actively participated in code reviews and knowledge-sharing sessions to ensure high-quality code and create a collaborative team environment.

## AVEDsoft, Wordpress Developer

Nov 2016 - Jun 2017

- Led a team of three WordPress developers, assisting in enhancing their skills in Git, JavaScript, jQuery, and Bootstrap. Designed and implemented a machine learning system with more than 80% accuracy in predicting hardware malfunction;
- Contributed to the development of online stores, sports portals, international corporate websites, restaurant sites, and booking systems. Technologies involved include WordPress, CSS, Git, Bootstrap, jQuery, and MySQL.

## UDTech, Junior Web Developer

Aug 2015 - Aug 2016

- Participated in the development of a large international airsoft resource. Developed corporate, sports, and product promotion websites;
- Technologies involved include Yii2, PHP, WordPress, HTML, JavaScript, jQuery, CSS, Bootstrap, and Git;
- Acquired skills in Git, Yii2, PHP, MySQL, and principles of MVC architecture, and deepened knowledge in HTML, CSS, Bootstrap, WordPress, and jQuery.

---

React JS	3	intermediate
Node.js	<1	beginner
Next Js	<2	intermediate
PHP	>5	intermediate
MySQL	>5	intermediate
Mongo DB	<1	beginner
CMS WordPress	>7	advanced
WebFlow	<1	beginner
Woocommerce	3	intermediate
Gulp/Webpack	>3	intermediate
Bootstrap/Foundation	>5	advanced
Git	>5	advanced

## EXAMPLES OF SOME PROJECTS I HAVE BEEN WORKING ON:

### Quality of models\*

2023

A service for researching the quality of 3D models and the possibility of printing using different materials and printers.

#### **Responsibilities:**

- Cross-browser development;
- Implementation of a new functionality;
- Support and refactoring of legacy code;
- Work with the database and Node.js;
- Collaboration with team of 20+ people.

**Technologies:** ReactJs, TypeScript, NodeJs, MySql

### School Work\*

2022

A portal for schools where teachers can create lessons on various topics and difficulty levels, and also includes a student testing system.

#### **Responsibilities:**

- Development of cross-browser pages from Figma;
- Integration with CMS Wordpress;
- Creating custom API from Wordpress;
- Developing new features and reusable gutenber components;
- Code improvement;
- Integration created API to React JS frontend.

**Technologies:** HTML5, CSS3 (SASS), JS (ES6), jQuery, WordPress, React JS

### Booking service\*

2021

A service for time management, development of an analogue of the Google calendar with the possibility of recording in time slots and handling of these time slots among themselves.

#### **Responsibilities:**

- Played a key role in establishing coding standards and best practice in a startup;
- Usage of React Admin;
- Cross-browser development.

**Technologies:** React Js, Hasura, Fullcalendar, TypeScript, GraphQL, TailwindCss

### Bitcoin\*

2020 - 2021

Support and implementation of a new functionality in a crypto exchange with a world name.

#### **Responsibilities:**

- Cross-browser development;
- Legacy code;
- Implementation of new UI/UX.

**Technologies:** React Js, SASS, Typescript

\* All project names have been anonymized to address any potential NDA concerns.
